EDUCATION

The University of Georgia Terry College of Business, Athens, GA
Master of Science, Business Analytics

August 2026 – May 2027

The University of Georgia Terry College of Business, Athens, GA
Bachelor of Business Administration, Management Information Systems

January 2023 – December 2025

- Relevant Coursework: Data Management and Analytics, Predictive Model Optimization, Secure Cloud Development, Business Process Management, IT Infrastructure, Project Management, Financial Management

TECHNICAL SKILLS

- **Languages:** SQL, Python, R, Java, HTML, CSS, JavaScript
- **Tools:** Tableau, Excel, Google Analytics 4, AWS, GitHub
- **Competencies:** Data Analysis, Business Intelligence, Machine Learning, Research Design, Process Mapping, Stakeholder Communication

WORK EXPERIENCE

ComicArc, Remote

May 2026 – Present

Solo Developer and Product Designer

- Architected and independently shipped ComicArc, a native macOS comic library and reader, using Python, Flask, SQLite, and PyWebView, packaged for public distribution via PyInstaller and signed for macOS Gatekeeper.
- Built a full library management system backed by a scanning pipeline with thumbnail caching, duplicate detection, and missing-issue flagging across CBZ, CBR, and PDF formats.
- Designed an in-app analytics dashboard (reading goals, streaks, pages read, publisher and series breakdowns) to surface personal usage data, applying the same data-visualization instincts from my analytics coursework to a consumer product.
- Built an in-app statistics dashboard tracking reading goals, streaks, and publisher/series breakdowns, packaged and signed for macOS Gatekeeper as a free, open-source, fully offline application.

University of Georgia, Athens, GA

February 2025 – December 2025

HCI Research Assistant

- Synthesized a corpus of 50+ peer-reviewed studies, extracting and mapping six theoretical frameworks to surface research gaps in AI and bot-driven persuasion, translating qualitative literature into a structured gap analysis.
- Co-designed a between-subjects experiment across 12 conditions to quantify how AI versus human authorship influences employee attitudes toward workplace AI adoption, contributing to research design, condition structuring, and variable operationalization.
- Delivered literature review findings to Information Systems faculty through formal written and verbal presentations, communicating how established social influence theories fail to account for non-human digital actors.

Withme.AI, Remote

January 2025 – March 2025

Business Developer Intern

- Developed a user segmentation framework by analyzing behavioral trends across early adopters, resulting in a structured audience targeting model that directly informed initial product positioning decisions.
- Mapped the end-to-end user engagement flow using process analysis techniques, identifying three critical drop-off points and delivering written recommendations projected to improve retention by 15%.
- Communicated data-driven findings through iterative presentations reviewed by team leadership, translating complex analysis into clear, actionable insights for a non-technical stakeholder audience.

Reel Talk Hub, Remote

February 2023 – Present

Founder, Head Journalist, and Data Analyst

- Founded and independently operate a film media platform producing original reviews, long-form criticism, and a podcast, managing all editorial strategy, content planning, and publishing workflows.
- Diagnosed high visitor drop-off rates using Google Analytics and PageSpeed Insights, identifying performance gaps and implementing targeted coding changes across page speed, search discoverability, and accessibility, achieving a perfect 100 Core Web Vitals score.
- Processed and cleaned audience engagement datasets using Python and Excel, designing an interactive Tableau dashboard to surface content performance trends and viewer behavior patterns, enabling data-informed editorial decisions.

INVOLVEMENT EXPERIENCE

Society for Management Information Systems (SMIS), Athens, GA

January 2024 – December 2025

Member

- Participated in case-based workshops applying data analysis and information systems strategy to real-world business problems.
- Collaborated on team projects involving data-driven problem-solving and stakeholder-facing presentations, reinforcing cross-functional communication skills.
